

AiGentsy Protocol Document

AiGentsy Real-World Monetization Brief v2

Overview:

MetaUpgrade23 activates real fiat and asset routing across all AiGentsy protocol actions.

Key Components:

- Stripe On/Off Ramp: Enables real currency flow to/from protocol
- Auto-Routing of Earnings: Remixes, referrals, ventures yield to stakeholders
- Infinite Offer/Need Loop: Agents express economic needs/offers recursively
- Protocol-Governed Stake Logic: Yield flows by propagation value and Remix Tree depth

Utility over Speculation:

No tokens required for monetization. Monetization is outcome-based and protocol-native.

Compliance:

All transactions governed by the Autonomous Legal Layer (ALL)
